Engines and Gearboxes : Duratec 2.0 Litre Engine 297bhp

I weighed the Duratec engine when it arrived at 102 kilos. I have since removed 2 kilos of stuff that doesn't do anything and the flywheel / clutch. This is very heavy at 15 kilos. I think a replacement with driven plate and cover will be around 7 kilos. This make the whole engine around 92 kilos. The block, crank, rods and pistons as an assembly are very easy to move around on your own.
