MerCruiser Fresh Water Cooling Kits

Most fresh water cooling systems are designed with raw water pumps that provide approximately 30 – 35 gallons per minute (gpm) of water flow. Therefore, for a full fresh water cooling system (including the engine heat load as well as the exhaust system) the general temperature rise for the raw water will be approximately 50 degrees F.

Closed Cooling System - Tip's - MerCruiser

This is comparable to Mercury Marine's five-year or 1000-hour extended-life coolant for Mercury engines. However, some engine-makers recommend changing out the coolant every two years. Obviously, the best bet is to follow your engine manufacturer's recommendations on maintaining the closed side of your engine's cooling system.

Inboard Engine Cooling Systems - boats.com

Mercury's Engine Guardian continually monitors critical sensors for any sign of a problem and immediately takes action, while the water-cooled Cool Fuel delivery system on the 8.2L Inboard engine prevents vapor lock. Rugged construction, including stainless-steel exhaust, ensures long-term, hassle-free operation.

Mercury® MerCruiser® Inboards | Mercury Marine

The Mercruiser stern drive is one of the most popular marine propulsion systems on the water. It is reliable and usually the annual maintenance performed during winter layup will prevent overheating problems. But when things do go wrong with the cooling system, the Mercruiser is easy to troubleshoot and repair.
