Ensure there are no visual differences imparted by the label itself; i.e., difference in writing, for instance. Ensure the given codes are not confusing, for example giving two similar codes in the same test such as 256 and 356 could be confusing for the sensory professional when preparing the products.

I selected the wood finish I considered most suitable and for about £10, I was in business. The way that this finish is applied is to lay down a base coat and let it dry; then lay down the top coat and while it is still wet, create the grain by drawing the comb through the top coat to expose the base coat.
