In physics, a field is a physical quantity, represented by a number or tensor, that has a value for each point in space and time. For example, on a weather map, the surface temperature is described by assigning a number to each point on the map; the temperature can be considered at a certain point in time or over some interval of time, to study the dynamics of temperature change.

Field (physics) - Wikipedia

Seattle used their next drive to get a field goal of their own, but only because of a sighting rarer than Halley's Comet: a Tyler Lockett drop. The possession lasted 7 plays and included a clean ...
