What is mass hysteria? - Medical News Today

Mass hysteria is medically classified as a mass psychogenic disorder, meaning that it is a condition that begins in the mind, rather than the body. Imagine dozens of nuns in a convent that begin meowing at one another (Middle Ages), or hundreds of soldiers all begin to experience respiratory symptoms, despite not being exposed to any toxins or pathogens (1988).

Mass Hysteria: Medicine, Culture, and Mothers' Bodies (review)

Mass psychogenic illness, also called mass sociogenic illness, mass psychogenic disorder, epidemic hysteria, or mass hysteria, is "the rapid spread of illness signs and symptoms affecting members of a cohesive group, originating from a nervous system disturbance involving excitation, loss, or alteration of function, whereby physical complaints that are exhibited unconsciously have no corresponding organic aetiology". Mass psychogenic illness Other namesMass hysteria, epidemic hysteria, mass soci

Mass psychogenic illness - Wikipedia

Main article: Mass psychogenic illness In sociology and psychology, mass hysteria is a phenomenon that transmits collective illusions of threats, whether real or imaginary, through a population and society as a result of rumors and fear. In medicine, the term is used to describe the spontaneous manifestation—or production of chemicals in the body—of the same or similar hysterical physical symptoms by more than one person. A common type of mass hysteria occurs when a group of ...

List of mass hysteria cases - Wikipedia

In Mass Hysteria: Medicine, Culture, and Mothers' Bodies, Rebecca Kukla argues that about two and a half centuries ago, Enlightenment ideology, modern science, and the rise of the nation-state produced a profound change that persists to this day in the cultural meanings assigned to maternal bodies: they were transformed "from private, almost furtive matters into vivid centers of public ...
