It offers comprehensive coverage of cost concepts, inflation, ACRS and modern methods of depreciation, income taxes, economic analysis.

Principles of Engineering Economic Analysis by John A. White

Principle 5: Consider All relevant Criteria The decision maker will normally select the alternative that will best serve the long-term interests of the owners of the organization. In engineering economic analysis, the primary criterion relates to the long-term financial interests of the owners. This is based on the assumption that available capital will be allocated to provide maximum monetary return to the owners. Often, though, there are other organizational objectives you would like to ...
